2. Key Terms

The table below defines the most commonly used abbreviations in this document.

<u>Term</u>	<u>Definition</u>
AORs	Areas of Responsibility
AST	Application Software Technology LLC (i.e., the chosen implementation vendor)
BIP	BI Publisher (Oracle Reporting Tool)
BPM	Business Process Management
BUs	Business Units
COA	Chart of Accounts
DFFs	Descriptive Flex Fields (Additional attribute / field enabled to capture any extra information for reporting, which is not part of Chart of Account segments / elements and structure)
EFF	Extensible Flex Field
EPM	Enterprise Performance Management
ERP	Enterprise Resource Planning
FSM	Functional Setup Manager
HCM	Human Capital Management
INV	Inventory
KDD	Key Design Decisions (KDD)
KFFs	Key Flex Fields
LDGs	Legislative Data Groups
LEs	Legal Entities
OBIEE	Oracle Business Intelligence Enterprise Edition
OSs	Organizational Structures
OTBI	Oracle Transactional Business Intelligence
PO	Purchase Order
POETA	Project, Organization, Expenditure (Item Date), Task, Award
PPM	Project Portfolio Management (i.e., Oracle Project & Grants)
RAID	<u>R</u> isks <u>A</u> ction Items <u>I</u> ssues & <u>D</u> ecisions Log

3. Key Design Decision Information

3.1 KDD Meta Data

Client Name:	Sewerage & Water Board of New Orleans
Project Title:	FINS-Vue Oracle Cloud ERP
Component(s):	Supply Chain Management (SCM) Approvals
Decision Name:	SCM Approvals
Decision (RAID Log) #:	If Applicable
AST Functional Owner:	Karen Hollomon
Client Functional Owner:	Alden Aramburo, Nowal Jamhour & Cash Moses
Purpose:	

3.2 SWBNO Decision Details

The purpose of this document is to provide a functional overview of the workflow that will be established to support SCM for the Oracle Financials Cloud implementation. Defining the logic for the routing of the various transaction types is a key component for the implementation.

Oracle Cloud applications provide the ability to route spending transaction types (e.g. material requests, requisitions, suppliers) through a pre-defined approval process referred to as workflow. A separate and unique workflow can be established for each transaction type.

The design contained herein is the result of the Discovery sessions held between Sewerage & Water Board of New Orleans and AST module team members.

3.3 Approach

3.3.1 Approval Key Concepts

1. **Cost Centers** – a cost center is a number that represents the smallest segment of an organization for which costs are collected and reported. It can be a division, location and/or project of an organization to which costs can be specifically allocated. Oracle requires at least one segment on the Chart of Accounts to be identified as "Cost Center". The proposed SWBMO Chart of Accounts has an "Organization" Segment which is a qualifier of "Cost Center".
2. **Project Manager** – is responsible for the project and is the primary authority if you have multiple project managers on your project. The project manager receives the approval notifications related to the project. If there are multiple project managers on a project, a primary project manager can be designated.

3. **Approval Group** – Consists of a static predefined set of users configured to act on a task. Depending on the participant type defined, approval tasks are routed to an approval group in serial or parallel mode.
4. **Supervisory Approval** – Approvals can be set up based on the employee supervisory hierarchy, which is defined in HCM. Employees must be set up in HCM with appropriate jobs and supervisors.

3.3.2 Types of Participants

A participant is a user or set of users who are participating in the approval process.

Participant	Description
Serial	Approvers work in sequence. This is a commonly used participant type for configuring rules using management hierarchies where approvals are performed in sequential fashion one after another.
Parallel	A set of approvers work in parallel. For example, an invoice is assigned to all users simultaneously. Unanimous approval is required; if one user rejects the invoice, the invoice will be rejected.
Single	A task is assigned to more than one user; however, the outcome is solely decided by the first user to approve or reject.
FYI	Users receive a notification for informational purposes only, no response is necessary. Users cannot perform any actions on FYI notifications.

4. Key SCM Workflow Decisions

4.1 Key Design Document

The Key Design document has been gathered by conducting a Discovery Session with users and provides insight into the end-to-end business process. This is to ensure that the data, rules, validations, and processing needs are documented from the end user's perspective.

4.1.1 SCM Approvals

Workflow	Module	Description / Steps
Supplier Registration	Procurement	1. Prospective Supplier selects Supplier Registration link via SWBNO's website. 2. Prospective Supplier Enters Data (Company Details, Contacts, Address, Business Classification, Products and Services, etc.). 3. The Office Worker Approves, Rejects, or Requests that the Supplier Resubmit. 4. The Procurement Director Reviews and Approves, Rejects, or Requests that the Supplier Resubmit The Requests to Resubmit action returns the request to the supplier, to complete missing data for resubmission. Suppliers cannot respond to rejected requests. Suppliers can register themselves through the supplier registration or they can be invited by Purchasing for Bids. In both cases, the supplier registration through the external portal will be routed for internal approvals.
Internal Supplier Registration	Procurement	Not Applicable. SWBNO will not be using this functionality. 1. The Internal user selects the Supplier Registration link within the application (Self Service Procurement / Responsive Procurement or Sourcing). 2. The Internal user Enters Data (Company Details, Contacts, Address, Business Classification, Products and Services, etc.). 3. Office Worker Approves, Rejects or Requests that the Supplier Resubmit 4. The Procurement Director Reviews and Approves, Rejects or Requests that the Supplier Resubmit The Requests to Resubmit action returns the request to the Internal User, to complete missing data for resubmission. Internal Users cannot respond to

Workflow	Module	Description / Steps
		rejected requests. The Requests to Resubmit action returns the request to the Internal User, to complete missing data for resubmission. Internal Users cannot respond to rejected requests.
Supplier Spend Authorized	Procurement	1. Execute Supplier Registration Steps. 2. The Office Worker promotes the Prospective Supplier to Spend Authorized. 3. Upon completing the review process, the Procurement Director will perform the approval action.
Supplier Profile Change	Procurement	1. Spend Authorized Supplier submits a request to change their Supplier Profile via the Supplier Portal 2. The Office Worker (Supplier Manager Role) will Review and Approves, Rejects or Requests More Information 3. The Procurement Director will Approve. 4. The Requests for More information option returns the request to the supplier, who provides additional information via Comments and resubmits the request. Suppliers cannot respond to rejected requests.
Negotiation / Solicitation Approval	Advanced Procurement	1. The Procurement Specialist creates the Solicitation from scratch or from a Requisition. 2. The Collaboration Team will be comprised of Procurement, PDU, Internal Audit, Risk Manager, EDBP and Legal. a. The Collaboration Team will be assigned tasks during the evaluation component of the Solicitation lifecycle. i. Only one task can be assigned per user. ii. Intermediate communications will be handled via messaging. 3. The Procurement Specialist will Submit for Approval. 4. The Procurement Director Reviews and Approves or Rejects or Requests More Information. 5. The Procurement Director Reviews and Approves or Rejects or Requests More Information.

Workflow	Module	Description / Steps
Negotiation / Solicitation Award Approval	Advanced Procurement	1. The Procurement Specialist will award the Solicitation. 2. The Procurement Director Reviews and Approves or Rejects or Requests More Information.
Contract Clause Approval	Advanced Procurement	1. Legal will create a Contract Clause 2. Automatic approval. The Legal party entering has authority to approval (Thereon Levi & Mary Arceneaux)
Contract Terms Template	Advanced Procurement	1. Legal will create a Terms Template 2. In sequential order the Special Counsel (Yoland Grinstead), then Executive Director (Randy Hayman)
(Procurement) Contract Approval	Advanced Procurement	1. A Procurement Contract is created. a. From Sourcing i. After the Complete Award process, the Procurement Analyst creates the Contract via the Analyze Award page. ii. Proceed to step b.ii. b. From Standalone in Contracts i. Legal creates the Contract. ii. Legal reviews, updates and Submits for Approval 2. A. In sequential order Legal Approval Group (Theron Levi & Mary Arceneaux) > Rita Laners B. An FYI notification to Legal Contract FYI Approval Group (Gloria Mackey, Joseph Daugrid, Teresa Nelson, Cole Dela Cruz and Cash Moses).
Requisition	Self-Service Procurement / Responsive Procurement	1. Requisition is entered by SWBNO Requester. 2. Purchase Requisition for restock for warehouse. a. Non-Min-Max i. Entered by Barbara Mack or Reginald Gilum. The approvals will occur in sequential order. Buyer > Manager (Michael Johnsey) > Department Head (Jason Garner) > Procurement Director (Cash Moses)

Workflow	Module	Description / Steps
		1. Contract exists – Y – No additional approval required 2. Contract exists – N, >30K Buyer > Buyer Supervisor > Manager (Michael Johnsey > Department Head (Jason Garner) Procurement Director (Cash Moses) b. Min-Max (Source = Supply Chain Orchestration i. Release by Public Works Supervisor (Reggie (Reginald) Gillum). Update Requisition and submit. The approvals will occur in sequential order. Buyer > Buyer Supervisor > Manager (Michael Johnsey) > Department Head (Jason Garner) > Procurement Director (Cash Moses) 1. Contract exists – Y – No additional approval required 2. Contract exists – N, >30K Buyer > Buyer Supervisor > Manager (Michael Johnsey) > Department Head (Jason Garner) > Procurement Director (Cash Moses) c. Approver Approves or Rejects or Requests More Information, regardless of the requisition amount. 3. Purchase Requisition is identified as Project based or non-project based. a. If project related: i. PPM Requests. The approvals will occur in sequential order for PPM Requests. Buyer > Buyer Supervisor > Principal Investigator > Steve Young > General Superintendent (Steve Nelson) > Procurement Director (Cash Moses) ii. Approver Approves or Rejects or Requests More Information, regardless of the requisition amount. iii. If non-project related, continue with the approval process 4. Non-Project Related – Expense Destination. The approvals will occur in sequential order. Buyer > Buyer Supervisor > Cost Center Manager (of Requester) > Director (of Cost Center Manager) a. Materials and Supplies > 30K > Department Leadership; Deputy GSO > Chief Administrator > Procurement Assistant (if P-Card; CAPITAL ONE N.A.) > Procurement Director

Workflow	Module	Description / Steps
		b. Professional Services (Categories)> 15K > Department Leadership; Deputy GSO > Chief Administrator > Procurement Assistant (if P-Card; CAPITAL ONE N.A.) > Procurement Director c. Non-Professional Services (Categories)> 30K > Department Leadership; Deputy GSO > Chief Administrator > Procurement Assistant (if P-Card; CAPITAL ONE N.A.) > Procurement Director d. Approver Approves or Rejects or Requests More Information, regardless of the requisition amount. 5. Purchase Requisition requires a Solicitation a. Populate header DFF (DBE Percentage). b. The approvals will occur in sequential order. Buyer > Buyer Supervisor > Cost Center Manager (of Requester) > Director (of Cost Center Manager) > Department Leadership; Deputy GSO > Chief Administrator > PDU > Risk Manager > EDBP > Legal (Approval Group) > Executive Director > Procurement Director c. Approver Approves or Rejects or Requests More Information, regardless of the requisition amount. d. The Procurement Director will assign the appropriate Procurement Specialist, after Approval. Note: A Mapping Set for requisition approvals will be utilized. If any level is missing in the mapping set, it will be skipped in the approval process. Note: The Funds Override Approver functionality will not be used. Note: The Negotiated check box needs to be enabled on the requisition lines, not associated with Complex Purchase Orders (i.e., with Retainage). Note: Self-Approval of requisitions is restricted / not allowed. The Reject actions, return the requisition to the Requisitioner for modifications. The Requisitioner can update and resubmit the transaction or cancel the transaction. The Request for More Information notifies Requester to provide additional information.

Workflow	Module	Description / Steps
		Changes requested for a requisition associated with a purchase order, requires Requisition re-approval, in the same sequence outlined on the requisition including Buyer, Buyer Supervisor and Procurement Director Approval.
Purchase Order	Purchasing	1. Purchase Order identified as standalone or with supporting Purchase Requisition. a. Supporting Requisition? i. If a Solicitation is required, the Procurement Director will reassign the requisition to the appropriate Purchasing Specialist. a. Procurement Specialist to follow the Negotiation / Solicitation Process. i. If a Solicitation is not required, Procurement Analyst creates PO via Add to Document Builder and Submits for Approval. ii. The Procurement Director Reviews and Approves, Rejects or Request More Information. b. Standalone PO? i. The Buyer creates the PO from scratch and Submits for Approval. ii. Procurement Director Reviews and Approves or Deletes Incomplete Purchase Order. The Reject actions, returns the purchase order to the Purchasing Analyst for modifications. The Purchasing Analyst can update and resubmit the transaction or cancel the transaction. The Request for More Information notifies Purchasing Analyst to provide additional information.
Agreements	Purchasing	1. Purchase Agreement initiated from Sourcing, Standalone or Contracts? a. Initiated from Sourcing, the Procurement Analyst / Specialist Reviews and Submits for Approval. b. Standalone – The Procurement Analyst manually creates the agreement details and Submits for Approval. c. Initiated from Contracts, Legal executes Create Agreement action from Solicitation.

Workflow	Module	Description / Steps
		2. The Procurement Director Reviews and Approves, Rejects or Request More Information. The Reject actions, returns the agreement to the Purchasing Analyst / Specialist for modifications. The Purchasing Analyst / Specialist can update and resubmit the transaction or cancel the transaction.
Work Confirmations	Purchasing	1. Work Confirmation initiated by: a. Requester i. Requester enters Work Confirmation and Submits for Approval. ii. The approvals will occur in sequential order. Project Manager > PDU (Approval Group) > Project Department Director iii. Approver Approves, Rejects or Requests More Information, regardless of the work confirmation amount. Note: Work Confirmations will be submitted by Requesters and not suppliers.
Inventory Management		
Workflow	Module	Description / Steps
Material Requests	Inventory	1. Material Request is entered by SWBNO Requester. 2. Materials are picked and ship confirmed. 3. Materials are delivered to Requester. 4. FYI: To the Zone Manager & Q&A Manager
Cycle Counts	Inventory	1. Define a Cycle Count. a. Define Schedules and Approvals, i. Enable Approval Required. ii. Approval Type can be Always or If out of tolerance. 2. Warehouse workers execute Cycle Count. a. Note: Cycle Count does not need to be complete to begin the approval process. 3. Anyone having the job role of Warehouse Manager or Inventory Manager can Approve Count Sequences. Approve or request recount.

Workflow	Module	Description / Steps
Physical Inventory	Inventory	1. Define Physical Inventory. a. Approval Type can be Always or If out of tolerance. i. Note: Never is also an option. 2. Warehouse workers (or third-party) execute Physical Inventory a. Note: The Physical Inventory must be complete before going to the next step. 3. Select Action Approve Physical Inventory Adjustment. 4. Anyone having the job role of Warehouse Manager or Inventory Manager can Approve Count Sequences. Approve, Reject or Reset to Pending

4.1.2 Functional Setups

Oracle Cloud applications provide the ability to route spending transaction types (e.g., requisitions, purchase orders, sourcing events, procurement contracts, inventory events etc.) through a pre-defined approval process referred to as workflow. A separate and unique workflow can be established for each transaction type.

- Manage Supplier Registration Approvals
- Manage Internal Supplier Registration Approvals
- Manage Supplier Spend Authorization Approvals
- Manage Supplier Profile Change Approvals
- Manage Supplier Negotiation Approvals
- Manage Supplier Negotiation Award Approvals
- ContractClauseApproval (BPM)
- TemplateApprovalHumanTask (BPM)
- ManageContractsApproval (BPM)
- Manage Requisition Approvals
- Manage Purchasing Document Approvals (Purchase Orders & Agreements)
- WorkConfirmationApproval (BPM)
- Manage Supplier Negotiation Award Approvals
- Manage Movement Request Approvals

4.2 Workflow Transaction Console

Overview of Workflow Transaction Console, this will be available only to Admin Users.

- One-stop place for workflow admin to review and manage all workflow tasks.
- Review failed workflow tasks and take appropriate action.
- Provides search capability on workflow tasks.
- View the latest status of workflow tasks.

Create transaction and initiate approvals for the transaction

View the status of the transaction in transaction console

Review error message and action plan for failed transaction

Recover the failed transaction

Transaction Manager: Transactions

5. Cloud Workflow Reports

5.1 Approval Group Report

The Approval Group Report provides detailed information about approval groups.

- Navigator → Tools → Schedule Processes → Schedule New Process → Approval Groups Report → OK → Submit. No parameters are needed, as it will list all the groups.
- The Approval Group Report can be seen in xlsx or xml.
- Sample Report from Discovery

Process Details

This process will be queued up for submission at position 1

Process Options Advanced Submit Cancel

Name Approval Groups Report

Process 287264 was submitted.

OK

5.2 Workflow Rules Report

Please note that the workflow Rules Report is not applicable to SCM at this juncture.

Transaction escalation after 48 hours. The transaction will move to the upline manager, outside of Procurement.

6. Synchronize Transaction Workflow Status

The Synchronize Transaction Workflow Status process ensures that the workflow status is updated correctly in SOA and Oracle Fusion Applications.

- Navigator → Tools → Schedule Processes → Schedule New Process → Synchronize Transaction Workflow Status.
- Second options: View Transaction Workflow Status or Synchronize Transaction Workflow Status.
- Run the report for View Transaction Workflow Status to see the stuck transactions.
- Run the report for Synchronize Transaction Workflow Status to update the status in the application or withdraw the transaction.

7. Best Practices for Successful Cloud ERP Approval Flow

Before creating any rules in the application three most important points should be taken into consideration to have a successful approval flow:

- ✓ Business Needs
- ✓ Maintenance of Rules and the Impact of Changes
- ✓ Performance issues and errors that can arise if rules are not configured properly.

7.1 BEST Practices Approval Routing

- ✓ Add Assign Managers to employees in Manage Users if you are using Hierarchy routing.
- ✓ Make sure users are active.
- ✓ Do not modify usernames once defined.
- ✓ Use Maximum Escalations Levels **OR** Highest Approval Title for Escalations
- ✓ If you change Approval Group names you need to modify them in the rules as well as this is not done automatically
- ✓ Enable "Skip Creator for Approval List" if you want to avoid the creator of the transaction approving his transaction if he is part of the approval flow.

7.2 TIPS and Tricks

Workflow rules do not check the privileges assigned in roles so even if a user has only Employee and Financial Analyst role which is Read Only (the user will not be able to edit the journal/task in UI) and the approval is routed to him as he is part of an approval group/supervisory/job level etc. he will be able to take action-Approve/Reject the transaction.

8. Additional Comments

- The following modifications were requested:
 - Cash:
 - Work Confirmation will only be done by the Requesters. The options for Procurement & Suppliers are not needed.
 - Requisitions with supporting agreements follow the same approval process, as requisitions without a supporting agreement.
 - Mr. Alden:
 - The Requisition process for inventory

9. Approvals < Optional >
