1. Version Control

Date	Version	Author	Description of Change
03/09/2025	001	Keerthi Kuchi	Initial Draft
05/08/2025	002	Rodolfo Fitzgibbons	Added changes and approved by APS
09/10/2025	003	Keerthi Kuchi/ Sanjay Katara	Second Version (Finalized)
01/21/2026	004	Keerthi Kuchi/ Sanjay Katara	Final Version Approved by Crystal Pierson
02/25/2026	005	Keerthi Kuchi	Added changes for P-card and POETA
04/27/2026	006	Keerthi Kuchi	Go-live Finalized – (updated UAT changes)
06/03/2026	007	Keerthi Kuchi	Go-Live Ready Document

1.1 Participants and Reviewer

Review Date	Version	Participant	Decision
04/XX/2025	001	Crystal Pierson	Approved
11/XX/2025	002	Crystal Pierson	Approved
04/30/2026	006	Gyaneshwar Gujjari	
06/04/2026	007	Krishna Ravoori/Crystal Pierson	

1.2 Approved By

Name	Signature	Date
Crystal Pierson		

2. Key Terms

The table below defines the most used abbreviations in this document.

<u>Term</u>	<u>Definition</u>
AORs	Areas of Responsibility
AST	Application Software Technology LLC (i.e., the chosen implementation vendor)
BIP	BI Publisher (Oracle Reporting Tool)
BPM	Business Process Management
BUs	Business Units
COA	Chart of Accounts
DFFs	Descriptive Flex Fields (Additional attribute / field enabled to capture any extra information for reporting, which is not part of Chart of Account segments / elements and structure)
EFF	Extensible Flex Field
EPM	Enterprise Performance Management
ERP	Enterprise Resource Planning
FSM	Functional Setup Manager
HCM	Human Capital Management
SCM	Supply Chain Management
KDD	Key Design Decisions (KDD)
KFFs	Key Flex Fields
LDGs	Legislative Data Groups
LEs	Legal Entities
OBIEE	Oracle Business Intelligence Enterprise Edition
OSs	Organizational Structures
OTBI	Oracle Transactional Business Intelligence
PO	Purchase Order
POETA	Project, Organization, Expenditure (Item Date), Task, Award
PPM	Project Portfolio Management (i.e., Oracle Project & Grants)
RAID	<u>R</u> isks <u>A</u> ction Items <u>I</u> ssues & <u>D</u> ecisions Log

3. Key Design Decision Information

3.1 KDD Meta Data

Client Name:	Atlanta Public Schools
Project Title:	QUANTUM
Component(s):	Supply Chain Management (SCM) Approvals
Decision Name:	SCM Approvals
Decision (RAID Log) #:	ATPS-181
AST Functional Owner:	Keerthi Kuchi
Client Functional Owner:	Crystal Pierson
Purpose:	Display information on Purchasing approvals

3.2 APS Decision Details

The purpose of this document is to provide a functional overview of the workflow that will be established to support SCM for the Oracle Financials Cloud implementation. Defining the logic for the routing of the various transaction types is a key component for the implementation.

Oracle Cloud applications provide the ability to route transaction types (e.g. material requests, requisitions, suppliers) through a pre-defined approval process referred to as workflow. A separate and unique workflow can be established for each transaction type.

The design contained herein is the result of the Discovery sessions held between Atlanta Public Schools and AST module team members.

3.3 Approach

3.3.1 Approval Key Concepts

1. **Cost Centers** – a cost center is a number that represents the smallest segment of an organization for which costs are collected and reported. It can be a division, location, and/or project of an organization to which costs can be specifically allocated. Oracle requires at least one segment on the Chart of Accounts to be identified as "Cost Center". The proposed SWBMO Chart of Accounts has an "Organization" Segment which is a qualifier of "Cost Center".
2. **Project Manager** – is responsible for the project and is the primary authority if you have multiple project managers on your project. The project manager receives approval notifications related to the project. If there are multiple project managers on a project, a primary project manager can be designated.

3. **Approval Group** – Consists of a static predefined set of users configured to act on a task. Depending on the participant type defined, approval tasks are routed to an approval group in serial or parallel mode.
4. **Supervisor** - Approvals can be set up based on the employee supervisory hierarchy, which is defined in HCM. Employees must be set up in HCM with appropriate jobs and supervisors.

3.3.2 Types of Participants

A participant is a user or set of users who are participating in the approval process.

Participant	Description
Serial	Approvers work in sequence. This is a commonly used participant type for configuring rules using management hierarchies where approvals are performed in sequential fashion one after another.
Parallel	A set of approvers work in parallel. For example, an invoice is assigned to all users simultaneously. Unanimous approval is required; if one user rejects the invoice, the invoice will be rejected.
Single	A task is assigned to more than one user; however, the outcome is solely decided by the first user to approve or reject.
FYI	Users receive a notification for informational purposes only; no response is necessary. Users cannot perform any actions on FYI notifications.

4. Key SCM Workflow Decisions

4.1 Key Design Document

The Key Design document has been gathered by conducting a Discovery Session with users and provides insight into the end-to-end business process. This is to ensure that the data, rules, validations, and processing needs are documented from the end user's perspective.

4.1.1 SCM Approvals

Workflow	Module	Description / Steps
External Spend Authorized Supplier Registration Approval (Setup Task)	Procurement	1. Supplier selects Spend Authorized Supplier Registration link via APS's website. 2. Spend Authorized Supplier Enters Data (Company Details, Contacts, Address, Business Classification, Products and Services, etc.). 3. The Supplier Manager Approves, Rejects, or Requests that the Supplier Resubmit. Once approved, the supplier gets registered as an APS Spend authorized supplier. The Requests to Resubmit action returns the request to the supplier, to complete missing data for resubmission. Suppliers cannot respond to rejected requests. Suppliers can register themselves through supplier registration, or they can be invited by Purchasing Bids. In both cases, supplier registration through the external portal will be routed for internal approvals. When Supplier submits the registration request, System routes the request to Supplier Manager Approval group defined in the system. The approval flow is set to Parallel and First responder wins. (Only Procurement Dept has control over Supplier requests at APS) Rule: Approval Group is identified by system

Workflow	Module	Description / Steps
Internal Supplier Registration Approval (Setup Task)	Procurement	1. The Supplier Manager/Admin selects the Supplier Registration link within the application (Self-Service Procurement / Responsive Procurement or Sourcing). 2. The user Enters Data (Company Details, Contacts, Address, Business Classification, Products and Services, etc.) on behalf of supplier. (In case there were walk ins or Email or mail-based supplier details sent to APS) 3. System auto approves once user saves the profile only if the user has a supplier Manager role. However, if any user with Supplier Administrator roles tries to create a supplier, the system triggers approvals and routes the request to "Supplier Manager Approval Group". The approval flow is set to Parallel and First responder wins. (Only Procurement Dept has control over Supplier requests at APS) Rule: Approval Group users can register without approvals, any admin not part of the group
Internal Supplier Profile Change Approval (Setup Task)	Procurement	1. The Supplier Manager/Admin updates the supplier profile with changes provided by the supplier. 2. System auto approves once user saves the change requests/ change info only if the user has supplier Manager role. However, if any user with Supplier Administrator roles tries to edit a supplier profile, the change request must be submitted. System triggers approvals and routes the request to "Supplier Manager Approval Group". The approval flow is set to Parallel and First responder wins. (Only Procurement Dept has control over Supplier requests at APS)

Workflow	Module	Description / Steps
		Rule: System identifies Manager group and allows them to make changes without approval. Any Supplier Admin user tries to make a change; system triggers approvals and routes to "Manager Group".
Requisition (BPM Setup Task)	Self-Service Procurement/ Responsive Procurement	1. Requisition is entered by APS Requester. 2. Purchase Requisition associated with an Agreement? a. If not, continue by filling out the supplier details and the rest of the requisition information based on which the approval process gets triggered. b. If yes, search and add the agreement details, and enable "The Negotiated" Check flag this triggers touchless purchasing process after requisition gets approved 3. Purchase Requisition requires project details? a. If not, continue with the General fund account code details under Charge Account b. If yes, the Requester will choose project and task details (SPLOST/GRANT) which drives the account code combination plus additional Requisition approvals c. If Requisition has more than 1 special condition, system routes it to both special condition approval groups and then routes it to District approvals (2nd layer) 4. Once requisition gets submitted, approvers in the approval hierarchy Approves or Rejects or Requests More Information, regardless of requisition amount. 5. The system checks if requisition has any special conditions like below:

Workflow	Module	Description / Steps
		a. Is it project SPLOST based? – Route it to Project based approvals as below: 1st layer: Single approver from SPLOST team with role Project Procurement Manager (Approval group created) 2nd layer: APS Fiscal Manager/ analyst Group 3rd layer: Principal Investigator (Driven by PPM module values) 4th layer: Senior Executive Director (Approval Group created) This will not follow District approvals Layer but will flow to CFO group if Req hits above 100K – End of approvals Condition: "Award Purpose" of a project is used to identify Splost based requisitions. b. Is it Federal Grant based? Rule -1: Under 50K - \$49,999 – APS Grant Specialists Approval group Rule 2: Above 50K - \$50,000 – APS Grant Specialists plus APS Program Directors Approval group Rule 3: Above 100K - FYI notification to Grant ED This will not follow District approvals Layer but will flow to CFO group if Req hits above 100K – End of approvals Condition: "Award Purpose" of a project is used to identify Federal based requisitions. c. Is it State/Local Grant based?

Workflow	Module	Description / Steps
		• Rule 1: Under 50K - \$49,999 -APS SL Grants Approval Group 1 • Rule 2: Above 50K - \$50,000 – APS SL Grants Approval Group 1 plus APS SL Grants Approval Group 2 This will not follow District approvals Layer, but will flow to CFO group if Req hits above 100K – End of approvals Condition: "Award Purpose" of a project is used to identify State/Local based requisitions. d. Is it IT Cost Center purchase based? If system detects IT purchase based on user selected IT cost center – it routes to the following: • Rule 1: First IT Dept approval Group • Rule 2: Then to APS IT Governance Approval group. • Rule 3: Next, it follows District Layer approvals Condition: "Cost Centers" of a project is used to identify IT CC based requisitions. e. Is it IT NIGP purchase based? If system detects IT purchase based on user selected IT cost center – it routes to the following: 1. First layer: APS IT Governance Approval group. 2. Next, it follows District Layer approvals

Workflow	Module	Description / Steps
		Rule: IT NIGP Codes added for System flagging • 03511 – AIRCRAFT MASTER CONTROL SYSTEMS, COMPUTER, ETC. • 20400 – COMPUTER HARDWARE AND PERIPHERALS FOR MICROCOMPUTERS • 20600 – COMPUTER HARDWARE AND PERIPHERALS FOR MAINFRAMES AND SERVERS • 20700 – COMPUTER ACCESSORIES AND SUPPLIES • 20800 – COMPUTER SOFTWARE FOR MICROCOMPUTERS, SYSTEMS, INCLUDING CLOUD-BASED (PREPROGRAMMED) • 20900 – COMPUTER SOFTWARE FOR MINI AND MAINFRAME COMPUTERS (PREPROGRAMMED) • 73012 – COMPUTER-AUTOMATED MEASUREMENT AND CONTROL (CAMAC) SYSTEMS AND DEVICES, ALL KINDS • 80432 – COMPUTERIZED MASTER CONTROL SYSTEMS, SPACECRAFT • 85546 – LIGHTING CONTROL SYSTEMS: MEMORY AND COMPUTER MICROPROCESSOR TYPE • 90728 – COMMUNICATIONS SYSTEMS; TV; MICROWAVE, TELEPHONE, COMPUTER, NETWORK • 92000 – DATA PROCESSING, COMPUTER, PROGRAMMING, AND SOFTWARE SERVICES

Workflow	Module	Description / Steps
		• 98400 – RENTAL OR LEASE SERVICES OF COMPUTERS, DATA PROCESSING, AND WORD PROCESSING EQUIPMENT • 20454 – MICROCOMPUTERS, LAPTOP, NOTEBOOK AND TABLETS • 20655 – INTEGRATED HARDWARE-SOFTWARE IT, TURNKEY SOLUTION, SERVER AND MAINFRAME COMPUTER • 20687 – SERVERS, MAINFRAME COMPUTER, APPLICATION, DATABASE, FILE, MAIL, NETWORK, WEB, ETC. • 20836 – DATA PROCESSING SOFTWARE, MICROCOMPUTER • 91759 – LEASE PURCHASE, COMPUTER SOFTWARE • 92007 – APPLICATIONS SOFTWARE FOR MICROCOMPUTER SYSTEMS: BUSINESS, MATHEMATICAL AND STATISTICAL, MEDICAL, SCIENTIFIC, ETC. • 92047 – SUPPORT SERVICES, COMPUTER, INCLUDES COMPUTER WARRANTIES • 92050 – SHREDDING SERVICES, COMPUTER COMPONENTS AND PERIPHERALS • 98574 – SOFTWARE, COMPUTER, RENTAL OR LEASE • 99829 – COMPUTERS, PARTS AND SUPPLIES, SALE OF SURPLUS AND OBSOLETE ITEMS

Workflow	Module	Description / Steps
		f. Is it Fixed Asset based? If system detects Fixed Asset based purchase, it triggers following approvals Rule: Any Goods based Line type Requisition where each/any line is greater than 5K, then system routes to FA approval group. Services are not considered for FA approvals. Approval: After FA Group, It follows District Special layer approvals. Note: FA approvers have a special privilege to edit requisition and update FA flags if required and push it to the next group of approvals. A. Is it Smart Form Based Emergency Smart Form – (Serial) 1st Approver – Dept Supervisor 2nd Approver – Procurement ED 3rd Approver – CFO 4th Approver – Dep Superintendent Rule: Smart Form" name is the identifier P-Card Balance Smart Form – - Follows General District Approvals (Cost Center Manager – Supervisor and if Req is above 100K (CFO)) Rule: Smart Form" name is the identifier Note: For P-card, if a delegator is trying to request P-card associated to a different user, they must change

Workflow	Module	Description / Steps
		requester name, deliver to location and charge account segment so that requisition gets routed to the correct supervisor for approvals. 6. If the system skips or passes through 1st layer of approvals, it proceeds to next layer of approvals as follows If requisition is submitted for 2nd layer of approvals: Rule: Any requisition that doesn't meet special condition mentioned above will be routed as mentioned below Rule: Any requisition that has POETA details will go to Special approvals, any requisition that does not have POETA value, system routes it to 2nd layer of approvals - Regardless of Dollar value of a requisition – it gets routed to Cost Center Manager (Budget Center Manager) approves, rejects or requests more information. (Regardless of Requisition Dollar value once CC manager approves) - Requestor's Supervisor reviews and approves, Rejects or Requests More Information. - If CC manager plus Supervisor approves and if requisition total amount is greater than \$100K, CFO Reviews and Approves. Request More Information and Reject actions, return the requisition to the Requisitioner for modifications. The Requisitioner can update and resubmit the transaction or cancel the transaction.

Workflow	Module	Description / Steps
Purchase Order (Setup Task)	Purchasing	1. Purchase Order identified as standalone or with supporting Purchase Requisition. - If it is a catalog based, punchout based, or Emergency Smart Form based requisition, system auto creates and auto approves a purchase order once requisition gets approved - If it is a non-catalog-based requisition, system assigns Requisition to the buyer based on buyer NIGP assignment rules and buyer must process the requisition as Purchase order. It is then auto approved by the System. 2. Purchase Order Change Order initiated by Buyer - If amount or Quantity of a PO line is increased, it triggers system approvals for PO change Order. PO gets routed to 1. Cost Center Manager 2. Supervisor of Requestor 3. If the total amount is above 100K it goes to CFO and gets approved. 3. Purchase Order Change Order for P-Card Balance based Smart Form gets initiated by P-card Administrator (requestor) - PO gets routed to 1. Cost Center Manager 2. Supervisor of Requestor 3. If total amount if above 100K it goes to CFO P-card PO's are handled by P-card Admin team and not by Procurement department

Workflow	Module	Description / Steps
		Request More Information and Reject actions, returns the purchase order to the Buyer for modifications. The Buyer can update and resubmit the transaction or cancel the transaction.
Construction Purchasing – Work Confirmation (Setup Task)	Purchasing	A. This request gets routed for approvals as below: • 1st Approver – Fiscal Managers Group • 2nd Approver – Project Manager (driven by PPM) • 3rd Approver – Principal Investigator (driven by PPM) • 4th Approver – Senior Exec Director (Rule: Only above \$25,000) End of approvals
Agreements (Setup Task)	Purchasing	1. Purchase Agreement initiated Standalone a. Standalone – The Procurement Analyst/ buyer manually creates the agreement details and Submits for Approval. b. System auto approves the agreement Request More Information and Reject actions, returns the agreement to the Buyer for modifications. The Buyer can update and resubmit the transaction or cancel the transaction.

4.1.2 Functional Setups

Oracle Cloud applications provide the ability to route spending transaction types (e.g., requisitions, purchase orders, sourcing events, procurement contracts, inventory events etc.) through a pre-defined

approval process referred to as workflow. A separate and unique workflow can be established for each transaction type.

- Manage Spend Authorized Supplier Registration Approvals
- Manage Internal Supplier Registration Approvals
- Manage Internal Supplier Profile Change Approvals
- Manage Requisition Approvals ([TxnDiagnosticReport_202653 \(1\).html](#)) - Setup by Technical Team
- Manage Purchasing Document Approvals (Purchase Orders & Agreements)
- Manage Work confirmation Approvals

A user with "Application Consultant" or other Super User access will be able to navigate the system to update the Setups. Click on top right corner "Initials" icon -> Setup and Maintenance -> Click on Tasks -> Search -> Type few characters of the task with "%" symbol before and after the chars and you will be able to view System displayed search results.

4.2 Workflow Transaction Console

Overview of Workflow Transaction Console, this will be available only to Admin Users.

- One-stop place for workflow admin to review and manage all workflow tasks.
- Review failed workflow tasks and take appropriate action.
- Provides search capability on workflow tasks.
- View the latest status of workflow tasks.

If a user would like to check the status of a transaction (PO, Requisition, Invoice etc – they can check as shown in above examples)

5. Cloud Workflow Reports

5.1 Approval Group Report

The Approval Group Report provides detailed information about approval groups.

- Navigator → Tools → Schedule Processes → Schedule New Process → Approval Groups Report → OK → Submit. No parameters are needed, as it will list all the groups.
- The Approval Group Report can be seen in xlsx or xml.
- Sample Report from Discovery

Process Details

This process will be queued up for submission at position 1

5.2 Workflow Rules Report

Please note that the workflow Rules Report is not applicable to SCM at this juncture.

6. Synchronize Transaction Workflow Status

The Synchronize Transaction Workflow Status process ensures that the workflow status is updated correctly in SOA and Oracle Fusion Applications.

- Navigator → Tools → Schedule Processes → Schedule New Process → Synchronize Transaction Workflow Status.
- Second options: View Transaction Workflow Status or Synchronize Transaction Workflow Status.
- Run the report for View Transaction Workflow Status to see the stuck transactions.
- Run the report for Synchronize Transaction Workflow Status to update the status in the application or withdraw the transaction.

7. Best Practices for Successful Cloud SCM Approval Flow

Before creating any rules in the application three most important points should be taken into consideration to have a successful approval flow:

- ✓ Business Needs
- ✓ Maintenance of Rules and the Impact of Changes
- ✓ Performance issues and errors can arise if rules are not configured properly.

7.1 BEST Practices Approval Routing

- ✓ Add Assign Managers to employees in Manage Users if you are using Hierarchy routing.
- ✓ Make sure users are active.
- ✓ Do not modify usernames once defined.
- ✓ Use Maximum Escalations Levels **OR** Highest Approval Title for Escalations
- ✓ If you change Approval Group names you need to modify them in the rules as well as this is not done automatically
- ✓ Enable "Skip Creator for Approval List" if you want to avoid the creator of the transaction approving his transaction if he is part of the approval flow.

7.2 TIPS and Tricks

Workflow rules do not check the privileges assigned in roles so even if a user has only Employee and Financial Analyst role which is Read Only (the user will not be able to edit the journal/task in UI) and the approval is routed to him as he is part of an approval group/supervisory/job level etc. he will be able to take action-Approve/Reject the transaction.

Several important considerations need to be made when choosing the approval hierarchy to guarantee compliance with reporting regulations, operational effectiveness, and alignment with business strategy.

- Approval management uses human workflow to automate tasks that are passed from a user or an application to another user or group for consideration or action.
- The key to using jobs or positions depends on how each is used.
- Positions offer a well-defined space independent of the person performing the job.
- Jobs are a space defined by the person.
- A job can be defined globally in the Common Set, whereas a position is defined within one business unit.
- The job and department of a position can be updated at any time. For example, if you hire someone into a new role and want to transfer the position to another department.

- Various Aspect of Approval rules are considered like stage, condition, participant, and actions.
- Stage: A stage lets you organize your approval routing rules into logical groupings.
- Participant: There can be more than one participant within a stage. Properties set on the participants determine whether approvals are routed in serial or in parallel.
- Condition: The Condition indicates when the approval rule will be applied. For example, a rule is created to conditionally apply if the requisition approval amount is less than 10,000 USD.
- Action: An action defines what needs to be done if the conditions of a rule are met. It identifies if approvals or FYI notifications are required, and the type of users needed to approve or receive notification for a document.

8. Approvals < Optional >

Approver Name	Title / Role	Signature	Date
< Name >	<Title >	X _____	4.XX.2025
< Name >	<Title >	X _____	4.XX.2025
